## Say goodbye to bacteria infested pull cords.

Greetings,

We would like to take this opportunity to introduce our solid plastic (PVC free) 3.0 millimeter and 1.8 millimeter germ cleanable pull cords.

This solid plastic (PVC free) design cannot absorb bodily fluids or liquids.

IRaIS Germ Cleanable Pull Cords are easily cleaned with products already in use by your housekeeping staff.

We offer a choice of colors in either red or white.

Included is our current Product Price Guide with part numbers, item pricing and pull cord samples.

Please don't hesitate to contact us if you would like samples or further information.

*Alternately, purchases can be made online at www. irais.com*

Thank you,

IRaIS, LLC

**A** proactive, rather than precautionary approach to infection control, can reduce the risk of transmission by micro-organisms.

We already use protective equipment i.e. gloves, goggles, masks, and gowns. Why haven't we addressed an area subject to major repetitive usage?

Our cleanable cords can be adapted to all manufactures toilet and shower stations, as well as over bed lighting.

We believe we are offering a sustainable solution to a potential problem involving many bodily fluid secretions.
