

INDUSTRIAL GERM CLEANABLE PULL CORD

For years, food processing plants have used a nylon cord tied to an actuator switch to control high speed door operation.

This nylon cord presented some interesting sanitation challenges.

For years, our revolutionary new pull cord for toilet switches and overbed lighting, has been used in medical facilities worldwide.

Now, YOU have asked us for a product for your plants!

This product is an ABS plastic, extruded to .400" in fluorescent green. Easy to grab, and most of all, easy to CLEAN. Any of your standard in-house cleaners as well as medical grade can be used to clean this product. No more excuses for dirty door actuators.

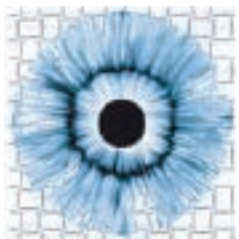

GCP.400 High Speed Door Pull Cord Industrial Grade. 250 foot roll.

GCP.402 Thimble for Industrial Pull Cord

GCP.403 Clamp for Industrial Pull Cord
